

SHORT CV:

Eliana B. Souto is Professor of Pharmaceutical Technology in the Faculty of Health Sciences at University Fernando Pessoa in Porto, Portugal. Professor Souto is graduated in Pharmaceutical Sciences from the Faculty of Pharmacy, University of Coimbra. She also obtained a post-graduated Master degree in Pharmaceutical Technology and Pharmacotechnique at the Faculty of Pharmacy, University of Porto, and awarded with the degree of PhD in Pharmaceutical Technology, Biopharmaceutics and Biotechnology at the Institute of Pharmacy, Free University of Berlin, Germany. In December 2007 she has been awarded with the Women In Science 2007 L'Oreal Portugal Prize, supported by UNESCO and the Portuguese Science and Technology Foundation, and granted by L'Oreal Portugal. Nowadays, Professor Souto coordinates the Euro-PhD in Advanced Drug Delivery from Galenos Network in her Faculty. Her research group is devoted to the design, development, and characterization of new drug delivery systems based on colloidal carriers. Other research interests are the controlled delivery of drugs across biological barriers, namely skin, gastrointestinal tract and blood-brain-barrier. Professor Souto is Associate Editor of the International Journal of Nanomedicine, being also on the Editorial Board of the Journal of Biomedical Nanotechnology, Die Pharmazie and Current Nanoscience, and is a member of the Advisory Board of several other peer-reviewed scientific journals.

Prof. Doutora Eliana Souto
